

The Community Table 2018 Responses

Conducted & Compiled By:

On September 12, 2018, the Marshall County Public Library, in cooperation with the Marshall County Schools and various community organizations, conducted the Community Table in order to evaluate the needs of those affected by the shooting at Marshall County High School on January 23, 2018. The Community Table consisted of two components—table discussions and an online survey. Twenty-five table discussions were conducted at Marshall County High School, and twenty-four table discussions were hosted throughout the community. The online survey was completed by 327 individuals.

In an effort to remove bias, the individual responses for the Community Table discussions were turned over to the College of Public Health at the University of Kentucky. The information was compiled by a graduate student and returned to the Marshall County Public Library for distribution.

For the online survey, Survey Monkey was used to gather information and generate reports. The information gathered by the Community Table was used by the Facilitators Of Community Unity/Support to plan a remembrance ceremony on January 23, 2019, and to guide their ongoing efforts to support recovery efforts.

Any questions regarding the Community Table or the information gathered should be directed to:
